PROFESSIONAL EXPERIENCE

Generalist Programmer, Ubisoft Montreal ✎ 07/2024 – present | Montreal, QC

- Developed and maintained **C++** ImGui debugging tools for *Assassin's Creed Hexe* (Anvil Engine), accelerating iteration workflows for gameplay and design teams.
- Designed and maintained **C++ automated test suites** covering critical gameplay systems (3C, AI, UI, Combat), improving code stability and catching regressions prior to QA handoff.
- Streamlined the package approval pipeline by integrating automated testing suites, cutting official build validation time by 3 hours per cycle.
- Prototyped an **LLM-based** unit test generation framework in collaboration with the R&D team, designing the evaluation sandboxes and validation logic to automate unit test generation.

Gameplay Programmer Intern, Beenox, Activision ✎ 01/2024 – 04/2024 | Montreal, QC

- Developed and Engaged in the World Wide Launch of **Call of Duty Warzone Mobile** ✎
- Improved gameplay experience related to **Player 3C, Core Movement, Weapon, Vehicle mechanics**, and **UI** using **C++**, **Lua**, and in-house scripting tools.
- Addressed and fixed more than 15 issues that affect a total of 30M+ active players.

Unreal Developer, Le Catnip Collective ✎ 05/2023 – 08/2023 | Montreal, QC

- Developed an online multiplayer party indie game, *Jumpin' Jazz Cats* ✎.
- Implemented **Gameplay Ability System** for player status and abilities based on **Lyra Starter Game** in **Unreal Engine 5, C++, Blueprint**, and created UI and HUD in **UMG**.
- Created 2 new Game Modes, and built a strong foundation for future development.

Gameplay Programmer Intern, Motive Studio, Electronic Arts ✎ 01/2022 – 08/2022 | Montreal, QC

- Prototyped and Engaged in the development of the upcoming **Iron Man game** ✎.
- Prototyped gameplay experience related to **Character status**, and **Combat resources** with **Gameplay Ability System** in **Unreal Engine 5, C++**, and **Blueprint**.
- Built gameplay features related to **Hit Detection**, and **Skill resources** with **Entity Component System** in **Frostbite Engine, C++**, and **Schematics 2**.
- Finished more than 20 gameplay tasks, and helped the prototype pass over 10 Sprints, internal goals.

SKILLS

C++, C#, Lua, Go, Unreal Engine 5, Anvil Engine, Unity, Frostbite Engine, SQL, Automated test, ImGui debugging tools, Perforce

EDUCATION

Bachelor of Computer Science, Concordia University 09/2019 – 05/2023 | Montreal, QC

- Dean's List 2020-2021
- Member of **Concordia Game Development Club**
- Relevant Courses: Advanced Program Design with C++, Data Structures and Algorithms, Introduction to & Advanced Game Development, Computer Graphics, Artificial intelligence
